

POLE POSITION

Introducing Batch 7

Pole Position Batch 7

Future of Compute

Meet the trailblazing **deeptech**
entrepreneurs transforming the future
of secure, sustainable computing.

Let's dive in!

QBIRD

Leading the way in secure quantum communications!
QBird's technology leverages quantum mechanics to
ensure data safety against any cyber threat, now and
in the future.

ORANGE QUANTUM SYSTEMS

Pioneers in quantum chip testing, OrangeQS accelerates quantum chip development with their turnkey solutions, aiming to make commercial quantum computing a reality.

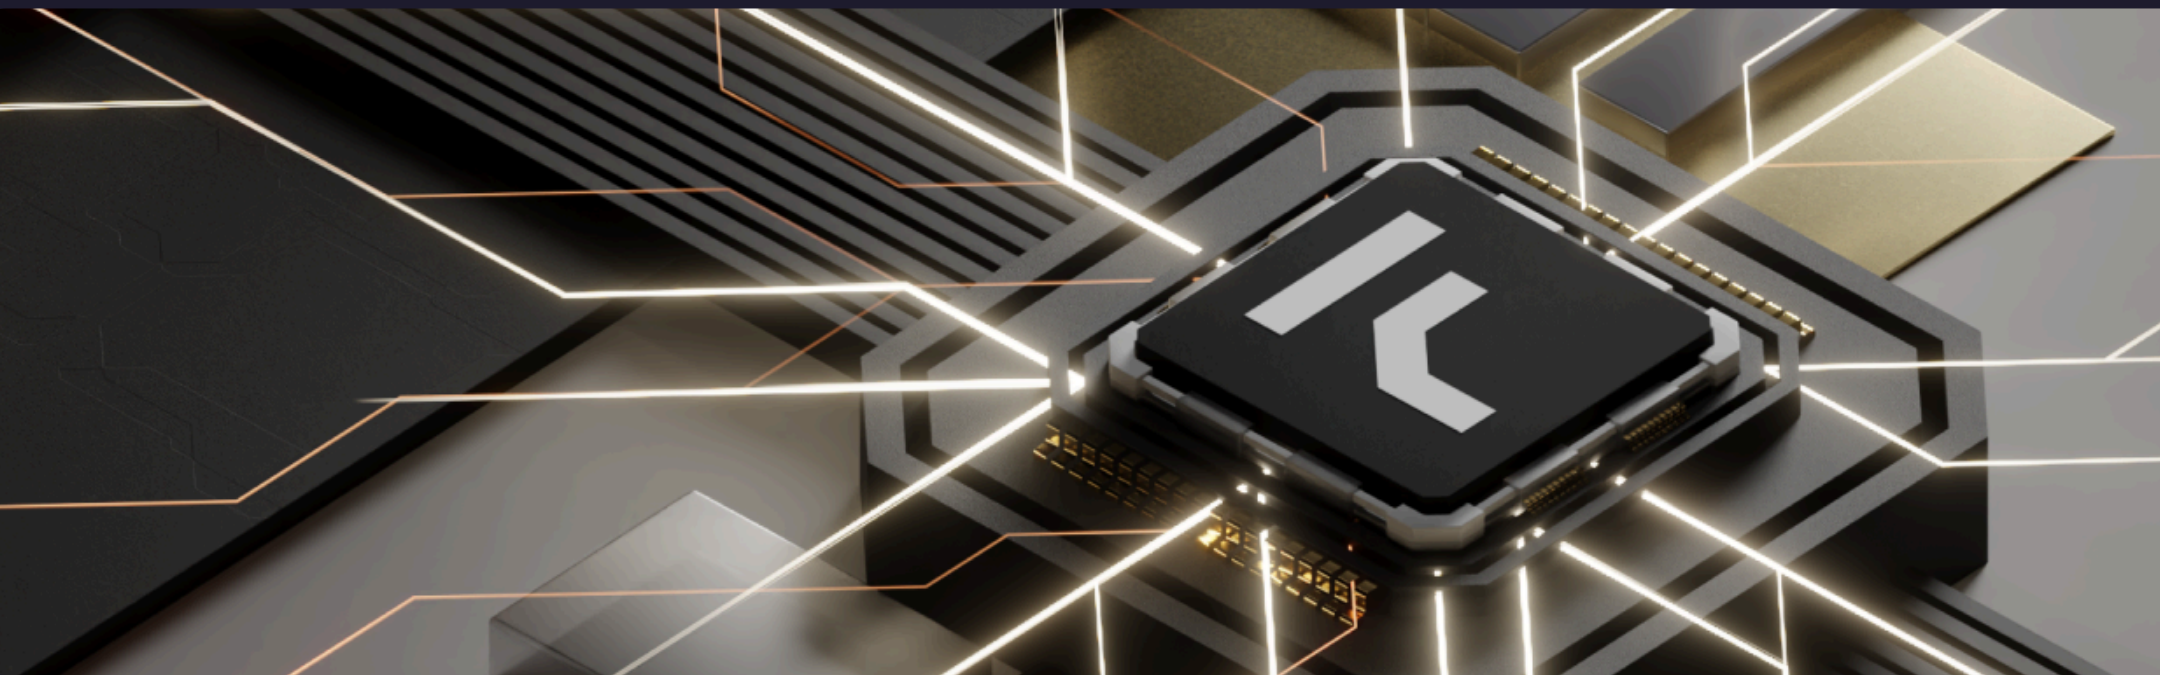

DELFT CIRCUITS

Supporting the future of quantum technology, Delft Circuits provides top-tier hardware for quantum engineers to help turn revolutionary quantum concepts into reality.

FORTAEGIS

Fortaegis is introducing a paradigm shift in the semiconductor industry with the 5 nm Secure Processing Unit (SPU). Designed to revolutionize secure and high-performance data processing, communication, and storage, the SPU enables the scaling of collaborative AI.

SCIL NANO

Enabling high-volume, precision nano-patterning for advanced tech applications like lasers, sensors, and LEDs. SCIL Nano's unique technology scales nano-manufacturing to new heights.

QUIX QUANTUM

Innovating with photonic quantum computers, QuiX Quantum combines scalability with low energy consumption, making quantum computing more sustainable and accessible.

INCOOLING

Cooling down data centers to cool down the planet. Incooling's energy-efficient systems reduce the environmental impact of data-driven AI technologies.

QUALINX

Creating ultra-low power GNSS tracking solutions, Qualinx reduces device battery use while boosting performance, helping us move towards a greener planet.

QPHOX

With its Quantum Modem technology, QphoX enables connectivity between quantum processors, paving the way for scalable quantum computing and the Quantum Internet.

We're thrilled to support these visionaries as they advance the future of computing. Let's make big things happen together!

Welcome to PolePosition Batch 7!
